Why is DTH drilling more efficient than top hammer drilling?

DTH drilling is more efficient than top hammer drilling because it is performed using compressed air and a rotary percussion cutting action. This is one of the three methods of rock drilling, along with rotary drilling and top hammer drilling.

What is DTH drilling?

DTH drilling is one of the three methods of rock drilling. DTH hammers are particularly useful for drilling in hard rock formations with a hardness over 200Mpa. Thus, using DTH hammers can lead to more efficient and effective drilling in challenging geological conditions.

What tools do you need to drill a hole?

From hammers, bits, shock absorbers, hole openers to casing systems and (WAI) water hammers and hole openers. Comprehensive range of DTH rock drilling tools for any tough environment. Cost effective drilling method for sample grade control and getting initial geological data.

Why should you choose a downhole hammer drill?

Shock Resistance- Built to endure high impact, our downhole hammer drills prevent premature wear or damage. Adaptable Sizing - Available in various sizes, these hammers cater to a range of drilling requirements, from small hole hammer projects to large boreholes.

What is DTH hammer drilling?

Our DTH hammer drilling expertise shines in various terrains, including the meticulous demands of foundation & geotechnical drilling, the rigorous intensity of blasthole quarry & mine drilling, and the precision of waterwell & geothermal boreholes.

What hammers are available for deep hole drilling?

Wide range of large diameter Down the hole (DTH) hammers for your Deep hole drilling. Drill King manufactures the widest range of high quality Down the hole (DTH) tooling. From hammers, bits, shock absorbers, hole openers to casing systems and (WAI) water hammers and hole openers.
