

Industrial drilling rig cellar company

What is cellar Tech?

Our Cellar Tech product line goes beyond containment, offering advanced well cellars, cellar installation, casing hangers, and more--each engineered to optimize safety, minimize risk, and enhance the overall aesthetics of industrial sites. Keep wells flowing during drilling, completions, or workovers--unimpeded by existing production trees.

Can a containment-well cellar handle rig-soil side loading or surcharge loads?

Our structurally designed containment-well cellar walls handle rig-soil side loading or surcharge loads. With the addition of some optional cellar features, the entire pad can be contained and considered zero discharge.

Why do you need a cellar Tech Solution?

Built for safety. Engineered for control. NOV's Cellar Tech solutions redefine well site efficiency with industry-leading containment well cellars. Designed to improve operational performance while exceeding modern HSE standards, our innovative approach safeguards both your project and the surrounding environment.

What is a custom fabricated cellar?

Our custom fabricated cellars are built with half-inch steel plate and are welded together to create a solid, water-tight seal. Each cellar has four exits for Flare Line. Optional ladders can be built for easy access. We also include a recessed lid for each cellar which provides a safe walking environment for foot traffic.

What makes our cellars so special?

Our cellars are built with a steel reinforced profile which provides durability and stability while also supporting the rig above. Still, our cellars are lightweight for easy handling and quick installation. Our cellars are crack resistant and elastic making it a popular choice for a variety of projects.

Why should you use a wellhead cellar system?

Our wellhead cellar systems enable safe, continuous SIMOPS, minimizing downtime and maximizing uptime. This adds significant NPV per well--often 10x the cost of our solutions. Maximize pad efficiency by reducing footprint, increasing well density, and standardizing wellhead areas to simplify planning, construction, and operations.

3 days ago OilFieldTrader is the go-to source for buying and selling new & used Oilfield Equipment. Buyers can find a full range of All Categories, Drill ...

When drilling a new oil or gas well, the "cellar" is a pit in the ground that provides the additional height between the rig floor and the wellhead, allowing for easier ...

Industrial drilling rig cellar company

“Petroleum Engineering: Drilling and Well Completion” by John Lee - Provides comprehensive information about drilling and completion operations, including cellar construction and design. ...

Check the well cellar's final orientation and elevation, and weld the extension ring to the conductor. Back-fill around the cellar with suitable material, and install a cover plate or grating.

As a leading rig equipment OEM and service partner, they offer comprehensive drilling rig solutions, aftermarket service support, and facilities engineering. ...

The cellar allows for the appropriate spacing of the topside assembly such that the key areas for operation are easily accessible. Layout of Wellhead and Cellar The cellar's ...

Primo Field Services provides expert foundation drilling for structural support in commercial, industrial, and civil construction projects. We deliver specialized cellar, conductor, and ...

Preferred Pump's Used Rig Marketplace is a great place to list your used water well equipment, drilling rigs, and pump hoists for sale.

Industry Truck mounted drill rigs find application across various industries including construction, mining, and water well drilling. They enable quick and ...

A road to the site is first constructed and the site leveled (if necessary), typically with bulldozers and/or graders. The scale and duration of leveling, digging, excavating, and ...

Kuwait Drilling CO. K.S.C.C. is Kuwait's premier Oil and Gas drilling company. We have Six decades of wide-ranging experience in the hydrocarbons industry and a reputation for ...

Cellar Tech offers structural cover plates and bar-grating systems to handle truck traffic, heavy equipment traffic, and rig substructure loading. Our structurally ...

Trifecta Oilfield Services will use an industrial pressure washing unit to clean drilling rigs, mud pits, cellars, and casing threads. We offer two- and four-gun ...

Newpark Mats & Integrated Services designs, installs & constructs cellars for your drilling rigs. We offer drill rig cellars, gas well cellars, pipe cellars, well head cellars, and containment well cellars.

Rig Technologies comprises two parts: Rig Equipment and Aftermarket Operations. Our Rig Equipment team engineers and manufactures drilling rigs, ...

Cellar, conductor & mousehole drilling Primo Field Services provides expert cellar, conductor, and mousehole drilling to support efficient and safe rig operations. Our precision-driven approach ...

Industrial drilling rig cellar company

13 hours ago; Recently, UNIQUE has exciting news: the 200-meter water well drilling rig, 18bar air compressor, and 3 sets of small spindle drill rigs delivered to our Philippine customer have ...

The document outlines the steps for well drilling and site preparation. It describes leveling the site, digging a cellar and mud pits, hammering a conductor pipe, ...

Expert in Surface/Cellar jobs, backyard rig ups, field service, operation management/completion, industrial cleaning on land drilling rigs and plants. Expert in tank cleaning, casing/tubing wash ...

Industry Truck mounted drill rigs find application across various industries including construction, mining, and water well drilling. They enable quick and efficient extraction of earth samples, ...

This document provides information about Cellar Tech Containment Well Cellar Systems, including their patented sealed well cellar designs. It highlights the ...

Our Cellar Tech product line goes beyond containment, offering advanced well cellars, cellar installation, casing hangers, and more--each engineered to ...

With our fleet of drilling and Geoprobe equipment, AARCO is prepared to install wells up to 12 inches in diameter through most geophysical matrixes, and obtain soil and groundwater ...

VELSON is the first automatic drilling rig manufacturer in India. We are manufacturing the Drill Rig for various applications like water well drilling, Blast hole drilling for mining, micro piling for ...

Material: The cellar should be constructed with durable materials capable of withstanding the rig's weight and the pressures of drilling operations. The Cellar: An Unsung Hero: While often ...

Our Commitment Is to provide expert drilling services with an emphasis on efficiency, timeliness and the safety of all involved. We support our clients' construction goals with extensive ...

Well Drilling Operations Once the well pad has been constructed it's time mobilize the drilling rig and assemble it on the well pad to allow well drilling operations ...

To support cellar preparation and maintenance our trailer mounted hydro-vac can wash the well head equipment and vacuum out the cellar. We offer jackhammers and compressors with ...

The cellar provides a work space around the hole for the workers and drilling accessories. The crew then begins drilling the main hole, often with a small drill truck rather than the main rig.

Drilltech Oilfield Equipment Manufacturing and Services LLC, is conveniently located in Dubai at the Dubai
