

The display screen of the down-the-hole drill is not lit

The SmartROC D55 is controlled via an advanced rig control system displayed on a touch-screen inside the comfortable, air-conditioned FOPS and ROPS-certified cabin. The screen presents ...

Probable cause No evidence of contact between the shoulder of the box thread and the pin indicates that the thread has not been made up correctly Corrective action Check ...

Use water or foam in flushing air to stabilize the hole Two Problem Bit striking face damage Probable cause Difficult to find signs causing this ...

In down-the-hole drilling a drill rod is fitted with a hammer at its lower end. The hammer, which is mounted on the drill bit, is activated through the addition of ...

Down-the-hole, or DTH drilling allows for reaching greater depths with the hammer located right behind the drill bit. Robit is a leader in DTH products.

CENTER ROCK products boast a formidable range of down-the-hole (DTH) hammers, presenting a suite of drills and downhole bits spanning 3.5"- 48" ...

STORE DEMOS - FEATURES TO POINT OUT Some customers mistakenly think every operation needs to be programed. It's important to point out that the machine does not ...

Can one bore a hole (laser cutter, diamond drill or anything else) through a flat panel display and still have the intact part of the display working ... or will the hole destroy the electrical ...

Down-the-Hole (DTH) hammers and drill bits are vital tools used in rotary percussion drilling. They are essential for creating deep boreholes through ...

When the total weight of the drill string including the weight of the rotary head exceeds the optimum thrust level, the drill string should be put in tension by gradually applying holdback as ...

The LCD screen is one sheet of glass, a very thin one. Now if think you can drill a hole through a thin sheet of glass without cracking it, go for it. Although, come to think of it, ...

Press and hold the Settings button until the Setup menu appears. Press the Down button to cycle through the options until B14 is selected. Press the Enter ...

The display screen of the down-the-hole drill is not lit

Edit Display Attributes Use this option to modify the display attribute settings for the currently loaded Drill and Blast holes. Through this option you will be able to control attributes such as ...

Down-the-Hole (DTH) drilling is a technique used to create deep, precise holes in hard rock and challenging ground conditions. In this method, ...

Discover the power of down the hole drilling technology featuring superior performance in hard rock, enhanced accuracy, and advanced automation capabilities for efficient and precise ...

Leopard(TM) DI550 diesel-powered, down-the-hole (DTH) drill has enhanced mobility, a smaller footprint and can serve multiple sites. Designed for DTH ...

If your down-the-hole rock drill stops working, the first thing you should do is check the power supply. For electrical drills, make sure the circuit breaker hasn't tripped and the fuse isn't blown.

Displaying Drillholes Viewing drillhole data in the scene is an important part of refining drillhole data and building a geological model. Therefore, Leapfrog Geo has a number of different tools ...

By following these six steps on how to drill blind holes, you can successfully and safely drill blind holes in a variety of materials for all your ...

The SmartROC D65 down-the-hole drill rig brings the future of mining within your reach today. Isn't it time you gave your operation the chance to profit from the added intelligence of the ...

Down-the-hole (DTH) drilling is a method used to drill boreholes in hard rock formations for various applications such as mining, construction, and quarrying. This technique involves a ...

A "down the hole" (DTH) drill is a piece of drilling equipment used in mining, construction, and exploration activities. It is specifically designed for drilling ...

Down the hole (DTH) drilling rig is the equipment that the impactor dives into the hole and directly impacts the drill bit, while the rotary machine drives the ...

DOWN-THE-HOLE-DRILL DCRL130 has established itself as a reliable, productive resource for drilling around the world. These drills have been proven in soft, medium and hard conditions ...

To Drill or Not to Drill the LCD Displays In this article I am talking about the consequences if you drill the LCD display (i.e. drilling out the mounting holes on a LCD module; I am not talking ...

1. PreparationEquipment inspection: Before starting, check that all components of the down-the-hole drill are

The display screen of the down-the-hole drill is not lit

in good condition, particularly essential parts...

Use the Display Settings option to configure the display attributes for the drillhole data viewed through the Drillhole Section Window, for example display ...

DTH drilling, also known as Down-the-Hole drilling, is a method used to drill boreholes into the earth's surface. This technique involves a hammer that is ...

Instructions On the Underground menu, point to Analyse, and then click Drill Hole Warning to display the Open Geological Database panel. Select one of the following options: Isis File : ...

The document discusses Down-The-Hole (DTH) drilling. DTH drilling involves a mini jackhammer located behind the drill bit that breaks rock into small pieces. It is a fast way to drill hard rock ...

? The above display may not be shown if fault is detected during self-test. ? The Main Menu will not be shown until all detections are completed if multi faults are found.

In my experience, it is a really good idea to hold the screen down while we are pulling the casing back. The tool string on a cable tool or the drill ...

The hydraulic system is critical for the operation of an integrated down-the-hole drilling rig. Check hydraulic fluid levels, inspect hoses for leaks or damage, and test the functionality of valves, ...
